

MATHIS TESSIER

Contact Information: (702) 601-0645 | mathistessier22@gmail.com

EDUCATION

University of Nevada Las Vegas, NV
Bachelor of Science, Computer Science

August 2019 – May 2023
GPA: 3.61

WORK EXPERIENCE

Intellimind

Junior Software Engineer

November 2022 - Present

- Built, provisioned, and deployed AWS infrastructure based on client needs and scenarios.
- Created Lambda functions that communicated with RDS, DynamoDB, and API Gateway services to connect the front-end of our website to a backend.
- Worked on the user experience of our website by developing the front-end in React.

UNLV Engineering Department

GUIC Summer Camp Mentor

February 2021 - July 2021

- Mentored over 50 female students from grades 6-12 in Python and Arduino programming.
- Led a group of 4-5 students in designing and creating their own project.
- Encouraged women to pursue a career in STEM and helped them realize their importance in the industry.

CORE SKILLS

- | | | | | |
|----------|-------|--------|---------|--------------|
| ▪ Python | ▪ C++ | ▪ HTML | ▪ CSS | ▪ JavaScript |
| ▪ SQL | ▪ Git | ▪ AWS | ▪ React | |

EXTRA-CURRICULAR ACTIVITIES

Kappa Sigma Fraternity

- Treasurer (January 2022 – December 2022)
 - Managed finances of fraternity by collecting dues from brothers, paying chapter bills, and creating semester budget.
- Scholarship Chair (January 2021 – December 2021)
 - Tracked grades of over 50 brothers and helped organization maintain over a 3.2 average GPA.

PERSONAL PROJECTS

Basic Login Form Webpage with Flask

Technologies used: Python, Flask, MySQL, HTML, CSS, JavaScript

- Flask webpage is connected to a MySQL database where user information such as name, email, and password are stored.
- User can create an account, and when they submit the form, a new user is added to the database with the provided information.
- User can then login to the website with credentials and choose to delete their account if they desire.

Market Data Analysis/Back-testing Engine for Stock Market

Technologies used: C#, APIs, OOP

- Retrieved data from the stock market using APIs by Tiingo.
- Programmed mathematical indicators such as RSI, MACD, Bollinger Bands etc.
- Programmed trading systems and back-tested them to obtain hypothetical returns.
